ACADEMIC QUALIFICATIONS

PGDM (Analytics and Operations)	SOIL School of Business Design, Gurgaon	2025-Present	Pursuing
B. Tech (ECE)	National Institute of Technology, Bhopal	2020-2024	74.6%
Class XII	New Shanti Niketan H S School, Vidisha (MP Board)	2019-2020	91.4%
Class X	Vatsalya Sr. Sec. School, Vidisha (CBSE)	2017-2018	90%

PROFESSIONAL EXPERIENCE

NB Entrepreneurs, Sales Analytics & Strategy Intern — April 2026- June 2026

Key Contributions

- NB Entrepreneurs needed to prioritize prospects among **900+ Indian pharmaceutical manufacturers** for its cellulose-based pharmaceutical excipients portfolio, as the sales team had limited capacity to pursue the entire market; developed a data-driven approach to identify high-potential companies.
- Segmented **900+ pharmaceutical manufacturers** using **clustering** into **3 distinct clusters**, enabling targeted prospecting strategies for the sales team.
- Developed a lead-scoring framework using **Marketing Mix Modeling** on the researched prospect dataset, using independent variables representing the **7Ps of marketing** to identify high-potential prospects and formulate cluster-specific pitching strategies.
- Applied **conjoint analysis** to identify **cluster-wise product-excipient preferences**, enabling targeted sales pitches that generated **50+ high-intent leads**, facilitated meetings with the Sales Manager, and contributed to **₹2,00,000+ in revenue**.

ACADEMIC / LIVE PROJECTS

Academic Projects

- **Operations & Supply Chain Analytics - E-commerce | SQL, Power BI, Python-**
  - An e-commerce operation required end-to-end process visibility across demand, inventory, sourcing, order management, fulfillment, delivery, and returns; designed an integrated **8-table PK-FK data model** and synthetic dataset.
  - Developed SQL analyses and Power BI dashboards with **15+ operational KPIs** to identify inventory/replenishment risks, supplier performance, delivery efficiency, and return leakage, culminating in an executive Control Tower for end-to-end operational process monitoring.
- **Advertising Channel Effectiveness and Sales Prediction| Python-**
  - Needed to determine which advertising channels most effectively drove sales from **200 records** of multi-channel spend data, to guide budget allocation.
  - Compared **Linear Regression and Random Forest** models, achieving **R^2>0.80** with **Random Forest** on test data, identifying TV and Radio as the strongest sales.
- **Agentic AI-Based Supply Chain Process Diagnostic Assistant**
  - Conceptualized an AI assistant to identify bottlenecks across procurement, inventory, and logistics and recommend process improvements.
  - Developed an Agentic AI diagnostic agent using **ElevenLabs** and a domain knowledge base to assess **AS-IS** processes, identify gaps, recommend **TO-BE** improvements, and map AI/automation opportunities.
- **CRM (E-commerce) | SQL, Python, Excel, Power BI-**
  - An e-commerce CRM lifecycle required an integrated view of customer acquisition, onboarding, campaign engagement, sales conversion, service, loyalty and retention; mapped **8 CRM sub-processes** and designed a relational data model using primary and foreign keys.
  - Generated **250** synthetic records across **8 linked tables** using Python and Excel, and developed **SQL business queries** to analyze lead conversion, campaign **ROAS**, **cart recovery, customer service KPIs, NPS/CSAT**, **churn risk and Customer Lifetime Value (CLTV)**; prepared a Power BI dashboard blueprint with KPI definitions, DAX measures, visuals and slicers.
- **Volunteer Consultant | Navjyoti India Foundation (SIP)-**
  - Retail entrepreneurs in an underserved community faced non-repayment of credit, loan failures and operational challenges (like inventory management) that were limiting their growth.
  - Evaluated business practices across **16** retail entrepreneurs, identified **6 key barriers**, and recommended financial literacy, documentation, and skill-building interventions.

AWARDS & ACHIEVEMENTS

Academics

- Published **IEEE** paper on **19-T Low Power Full Adder** circuit (45nm), **SCEECS 2024**, DOI.

Extra Curricular

- Participated in **Code for Good** (CFG'2023) **semi-finals** hackathon organised by **JPMorgan Chase & Co**.
- Winner of Harvard Business School **Supply Chain Simulation Game** in AI Week at Soil School of Business Design.
- Built a LinkedIn audience of **1,800+** followers, with individual posts generating up to **250K+ impressions** through consistent content creation.
- Participated in Aptitude Assessment of **HDFC Life's Aspire 2.0**, qualified for Solution Proposal Round.

SKILLS & CERTIFICATIONS

Tech Skills
Core Skills
Soft Skills

- Python, SQL, Excel, Power BI, R.
- Machine Learning, Deep Learning, Data Visualization, Marketing Analytics, Operations and Supply Chain Management, DBMS.
- Team Management, Leadership, Collaboration, Problem Solving, Stakeholder Management.

Certifications

- Certified in **Fundamentals of Business Analysis** on Udemy.
- Certified in **Business Analysis: Working with Use Cases** on Udemy.
- Certified in **The Complete JIRA Agile Project Management** Course on Udemy.
- Certificate of Completion - Summer Projects '26, **Consulting & Analytics Club, IIT Guwahati** | Decoding Customer Value: A Data-Driven Retention Strategy.
